CHUBB

* Chubb provides error and omission insurance to Silfab Solar Inc.

What energy independence looks like.

With over 40 years of experience in solar, Silfab continues to be the leader in solar manufacturing in North America, ensuring homeowners have the latest technology, superior manufacturing and North American customer service. **Silfab Elite** is the result of our most advanced design, engineering and aesthetics.

SILFAB ELITE

High-Efficiency Premium Mono-PERC PV Module with innovative back-contact technology. Exclusively manufactured in America.

AN ENGINEER'S DREAM.

Our innovative conductive backsheet and back-contact cell design eliminates the need for conventional stringing and bussing. With electrical contacts on the back of each cell, this allows the front of the module to collect and convert more light into energy. Reduced frontside metallization means less shadowing, maximizing your modules power density.

Reduced thermal stresses and lower operating temperatures dramatically improve reliability and performance.

STRONG, LIGHT, DURABLE AND MANUFACTURED IN AMERICA.

Precision automation and 100% US manufacturing ensures strict quality control. All of our locations feature fully automated production lines with ISO 9001:2015-accredited Quality Management Systems.

These modules are engineered and tested specifically for the North American climate and environment. Superior Performance and higher efficiency give you more power than other US made panels.

MAKE YOUR NEIGHBORS JEALOUS.

Sleek all black aesthetic looks elegant and compliments any roofline.

A WARRANTY YOU CAN TRUST.

An industry-leading 25-year workmanship and 30-year performance warranty backed by a company that has been perfecting solar products for over four decades.

LEADING CUSTOMER SERVICE.

Our North American team is available to provide customer service that is direct, efficient and local.
